

Easy installation

Install & update by only 1-line command

Easy to customize

Structured and SoC codebase helps with easy customize

Powerful backend

Using modern solutions such as WebSocket & Redis makes it as fast as it can be

Save Time

Saving Thousand hours of work

Support

Exclusive customer panel for after sale relations

Documentation

installation & configuration documentation included

ONLINE ECOMMERCE PLATFORMS FOR TRANSPORTATION RENTAL

- Bus reservation system
- Online ticketing system
- Bus Booking System
- LTR & RTL Support
- Fleet Management System
- Payment Integrated
- HMVC Multi-User System

ONLINE ECOMMERCE PLATFORMS FOR TRANSPORTATION

RENTAL is a very wonderful Bus and fleet Booking System, This Bus reservation system is developed by PHP and Code Igniter. It is mostly useful for any Bus, Fleet and Ticket Selling Company. It has a variety of features on Bus ticket Management.

Lorem ipsum is simply dummy text of the printing and typesetting industry. Lorem ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem ipsum is simply dummy text of the printing and typesetting industry.

Our Customers Say

Booking365 is a very good for ticketing. Thanks ★★★★★

Tanrot Ahmad (BIVISCI)

It is a long established fact that a reader will be distracted by the readable content of a page when looking at its layout. The point of using Lorem ipsum is normal distribution of letters, as opposed to using 'Content here, content here', making it look like readable English. Many desktop publishing packages use Lorem ipsum as their default model text, and a search for 'Lorem ipsum' will uncover many web sites still in their infancy. Various versions have evolved, sometimes by accident, sometimes on purpose (projected humour and the like).

Report System

The screenshot shows a web application interface for an administrator. On the left is a dark sidebar menu with the following items: Dashboard, Account, Agent, Enquiry, Fitness, Fleet Management, Human Resource, Offer, Price, Reports, Booking, and Assign. The main content area is titled "Reports / Booking" and contains a filter section with "Filter: All" and "Date: 2017-12-10" to "2017-12-10". Below this is a table with columns: Sl No., Booking Date, Booking ID, Trip ID, Route Name, Driver Name, Total Seat, Price, Discount, and Amount. The table currently displays "No data available in table".

Booking System

The screenshot shows a web application interface for creating a booking. The main form is titled "Ticket / Booking" and includes fields for: Route Name (with a dropdown and error message "Please select the route name"), Approximate Time (2017-12-10 10:05), Trip ID (with a dropdown and tabs for "Time", "Available Seats", and "AC available"), Offer Code, Price (with sub-fields for Price, Discount, and Amount), Passenger ID (with an "Add Passengers" button), Request Facilities, Pickup Location, and Drop Location. A sidebar menu on the right is titled "Ticket Management" and contains the following items: Passenger, Booking (with sub-items "Add" and "List"), Refund, and Feedback.
